

Company Description

JDH Engineering, Inc. is a team of structural consultants working with architects, construction managers, subcontractors, and fabricators to develop solutions for all aspects of the built environment.

With an informal, but hard working environment, our small company aims to empower its employees with opportunities to grow and develop professionally. As an organization, we look to continue our trajectory of growth and establish long term sustainability by meeting a wide variety of needs for structural expertise throughout the construction industry. We are looking for motivated & talented individuals to join us in this adventure.

Open Position - Structural Engineer II

The successful candidate will have experience working in the commercial construction industry, primarily performing structural design and detail for new construction projects.

Responsibilities will include design of projects from schematic level through construction, coordinating with architectural, mechanical, and civil trades. This will include the development of construction documents that include drawings and specifications, within the guidance and oversight of a senior engineer. Attendance at project meetings, review of shop drawings, answering RFIs, and site visits to review construction will all be part of the day to day activities of the candidate.

Skills and Experience

A bachelor's or master's degree in engineering with a Civil/Structural concentration.

Two to Five years working experience, developing skills in the following areas:

- Experience designing and detailing structural systems for commercial buildings, utilizing concrete, steel, masonry, and wood materials.
- Structural Analysis software such as RISA, RAM Structural System, Enercalc, and Adapt
- Post tensioned or prestressed concrete design experience is a plus
- Revit Structure
- AutoCAD
- A working knowledge of the International Building Code and material codes such as ACI and AISC.
- The ability to learn and adapt existing knowledge and experience to a new set of challenges
